BILLING CODE 6820-36-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-348 and 50-364]

Southern Nuclear Operating Company, Inc.; Notice of Consideration of Issuance of Amendment to Facility Operating Licenses, Proposed no Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-2 and NPF-8, issued to Southern Nuclear Operating Company, Inc. (the licensee), for operation of the Joseph M. Farley Nuclear Plant, Units 1 and 2 located in Houston County, Alabama.

The proposed amendments would revise Technical Specification (TS) Table 4.3-1 to delete the requirement for surveillance of the manual safety injection to the reactor trip circuitry until the next unit shutdown, following which, this testing will be performed prior to Mode 2 entry. This change is applicable only during Unit 1, cycle 14 and Unit 2, cycle 11.

This requested TS change is a followup to a Notice of Enforcement Discretion (NOED) granted to the licensee that is in effect from the time of issuance on June 21, 1996, until approval of this exigent TS. NRC Inspection Manual, Part 9900, "Operations—Notice of Enforcement Discretion," requires that a followup TS amendment be issued within 4 weeks from the issuance of the NOED.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff must determine that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:
